Transfer Station Operators Training Program

The Department is announcing a presentation of core training session number 1, *Transfer Station Operations* open to all. This will be a one-day workshop for municipal transfer station operators, commercial operators, selectmen, town managers, and others interested.

We have used a PowerPoint slide presentation of operational issues at transfer stations around the State in previous training sessions on this topic. The slides lead us through a visual discussion of how to operate a transfer facility and provide an opportunity to learn from others' successes and mistakes. This presentation has been updated to include new slides directing focus on the most recent challenges to operating transfer stations. There are new rules affecting municipalities engaged in or considering becoming engaged in recycling of waste wood. Please register to join us soon (space is limited at some locations). Directions to locations are available on our web site or upon request:
